PROFESSIONAL SUMMARY

Full-Stack Software Engineering undergraduate with hands-on experience independently designing, building, and deploying production web applications using React, Django REST Framework, Node.js, and Go. Proven ability to architect secure JWT authentication systems, design normalized relational schemas, and build RESTful APIs with clean service-layer structure — demonstrated across multiple live and GitHub-published projects. Strong frontend skills in React with component-based architecture, protected routing, and responsive UI. Actively deepening backend depth and seeking a Software Engineering or Full-Stack Developer internship to contribute within a professional engineering team.

EDUCATION

B.Sc. (Hons) Information Technology — Specialization in Data Science

2023 – 2027

SLIIT Northern University, Sri Lanka

G.C.E. Advanced Level - Biological Science Stream

2015 – 2023

J/ Vada Hindu Girls' College, Jaffna

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS v4, Bootstrap, React Router, Axios

Backend: Django 5, Django REST Framework, Simple JWT, Node.js, Express.js, Go (Gin), Spring Boot, Fast API (basic), PHP

Databases: MySQL 8, PostgreSQL, MongoDB - schema design, normalization, indexing, query optimization, raw SQL

Auth & API: JWT / OAuth 2.0, Token Blacklisting, RESTful API design, CORS, Axios interceptors, Postman

Dev Tools: Git, GitHub, Docker, Vercel, Render, Railway, VS Code, IntelliJ IDEA, Figma, Android Studio

Languages: JavaScript, TypeScript, Python, Go, Java, Kotlin, PHP, SQL, C, C++

Other: Android SDK, Agile / Scrum, OOP, MVC Architecture, Maven

PROJECTS

Linkerr - Travel Experience Listing Platform - 2026 | Live: Vercel · Render · Railway

React 19 · Vite · Tailwind CSS v4 · Django 5 · DRF · SimpleJWT · MySQL 8 · Axios · Vercel · Render · Railway

GitHub: <https://github.com/Vytheki-S/linkerr>

- Architected and deployed a full-stack platform independently across three cloud providers — React 19 + Vite on Vercel, Django REST Framework on Render, MySQL 8 on Railway - configuring CORS, and environment variables for a production-ready setup.
- Designed stateless JWT auth with SimpleJWT: refresh token rotation, server-side blacklisting on logout, and an Axios response interceptor that silently refreshes expired access tokens without user re-login.
- Built a custom IsOwnerOrReadOnly DRF permission class (public read / authenticated create / owner-only edit-delete), real-time search with 400ms debounce, server-side pagination (9/page), and dB index + select related optimizations eliminating N+1 queries.

GearUp - E-Commerce Web Application - 2026

React · Django REST Framework · MySQL

GitHub: <https://github.com/Vytheki-S/Gear-Up-E-commerce->

- Built a full-stack e-commerce system covering the complete flow - product listing, cart management, checkout, and order persistence using DRF serializers/views for structured API validation and React with Axios service layer for frontend integration.
- Created a normalized MySQL schema for products, categories, cart, and orders with foreign-key constraints; implemented cart API sync(add/update/remove) and a real-time stock validation endpoint that blocks over-ordering before order confirmation.
- Structured backend with modular Django apps (models, serializers, views) separating business logic from API layer; configured admin panel for product and order management and seeded a multi-category dataset to validate browsing, filtering, and search.

Leave Management System - Role-Based Workflow Application - 2026

Go (Gin) · PostgreSQL · React · Vite · JWT

GitHub: <https://github.com/VytheKi-S/Leave-Management-System>

- Built a Go (Gin) REST API with a structured handler → service → repository architecture and direct PostgreSQL query handling; enforced JWT authentication with role guards (admin / manager / employee) enforced at middleware level.
- Planned a state-driven leave request lifecycle (apply → review → approve/reject → cancel) with relational PostgreSQL schema, SCD-style balance tracking, and controlled concurrent DB operations to prevent invalid leave allocations.
- Integrated a React frontend with centralized Axios API layer and auth context for session handling; wrote raw SQL migrations for schema creation, seeding, and balance initialization ensuring reproducible environments.

EventAura - Enterprise Event Management Platform - 2025

React (TypeScript) · Django REST Framework · MySQL · Redis · Cloudinary

GitHub: <https://github.com/VytheKi-S/EventAura>

- Owned 3 core backend subsystems in a multi-module enterprise platform: designed Django app-level architecture for Complaint Management (ticket lifecycle: Open → In Progress → Resolved → Closed, priority routing, threaded admin responses, Cloudinary file attachments), Feedback System (booking-linked entries, moderation workflow, 5-star rating aggregation), and AI Chatbot (Gemini API integration, session-based conversation tracking, user-context-aware responses).
- Applied protected routes and auth state management using React Context with TypeScript; enforced organizer-only actions at both frontend route and DRF API permission levels.

Event-pro - Event Booking & Scheduling System - 2024

Java · JSP · MySQL · Apache Tomcat

GitHub: <https://github.com/VytheKi-S/Event-pro>

- Built a multi-role Java web application (Admin / Organizer / User) using Servlets, JSP, and MySQL, implementing full event lifecycle management including packages, bookings, venues, services, and complaint handling with role-based access control.
- Planned and implemented a modular MVC architecture with DAO layer integration, managing database operations through JDBC utilities, and ensuring structured separation across controllers, models, and views for scalable event management workflows.

CERTIFICATIONS & ACHIEVEMENTS

- Diploma in English - British College
- Hackathon Participant - Yarl Geeks Challenge 2024
- Code Storm Competitive Programming - Participant 2023 & 2024

SOFT SKILLS

Strong Willingness to Learn | Problem-Solving Mindset | Teamwork | Critical Thinking | Time Management | Effective Communication

LANGUAGES

Tamil: Full Professional Proficiency | English: Intermediate Working Proficiency
