PROFESSIONAL SUMMARY

Motivated Full-Stack Software Engineering undergraduate with hands-on experience building responsive, user-friendly web interfaces and scalable backend architectures using React.js, Django, Node.js, and Spring Boot. Proficient in JavaScript, TypeScript, Python, and SQL/NoSQL databases, with strong familiarity with component-based frontend architecture, RESTful API design, and Git version control. Proven ability to implement UI/UX designs into working frontend components and design clean service-layer backend structures. Eager to contribute to real-world product development, learn modern technologies, and grow within an experienced engineering team.

EDUCATION

B.Sc. (Hons) Information Technology — Specialization in Data Science

2023 – 2027

SLIIT Northern University, Sri Lanka

Relevant Coursework: Software Engineering, Data Structures & Algorithms, Database Systems, OOP, Operating Systems, Web Technologies, Machine Learning

G.C.E. Advanced Level — Biological Science Stream

2015 – 2023

J/ Vada Hindu Girls' College, Jaffna

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS, Tailwind CSS, Bootstrap

Backend Development: Node.js, Express.js, Django, Django REST Framework, Spring Boot, FastAPI (basic), Python, Java, PHP

Databases (SQL & NoSQL): MySQL, PostgreSQL, MongoDB, SQL Server

Version Control & Dev Tools: Git, GitHub, GitLab (basic), VS Code, Visual Studio, Android Studio, Postman, Figma, Docker (basic), IntelliJ IDEA, Eclipse

Programming Languages: JavaScript, TypeScript, Python, Java, Kotlin, PHP, SQL, C, C++

Mobile & Other: Android SDK, Kotlin (Android), JWT Authentication, OAuth 2.0, Agile (Scrum), OOP, MVC Architecture, Maven, Gradle

Data & BI Tools: Power BI, DAX, SSIS, SSAS, Star Schema Design, Excel (Pivot Tables, Charts), pandas, NumPy, R Studio

PROJECTS

JTCC Hall Management System — Full-Stack Web Application

2024

Tech Stack: React.js, Tailwind CSS, Django, Django REST Framework, JWT Auth, MySQL

- Built responsive, user-friendly frontend interfaces using React.js with a component-based architecture, translating UI/UX designs into fully functional booking, registration, and admin dashboard components.
- Designed scalable backend architecture with clean service-layer structure using Django REST Framework, implementing RESTful APIs secured with JWT authentication for role-based access control.
- Worked with SQL database (MySQL) to design a normalized schema for bookings, payments, users, and events; optimized database queries to improve backend response performance.
- Managed full development lifecycle using Git and GitHub for version control, branch management, and collaborative code integration across the project team.

ExamPro — Online Examination System — Web Application

2023

Tech Stack: JavaScript (ES6+), HTML5, CSS3, PHP, MySQL, Responsive Design

- Developed a responsive, user-friendly web-based examination platform, implementing dynamic frontend components in JavaScript for question rendering, timer logic, and real-time score display.
- Built a PHP backend with clean service-layer logic for user authentication, session management, and automated score calculation; connected to a MySQL database for result storage and retrieval.
- Applied frontend development best practices including semantic HTML5, CSS3 layouts, and responsive design principles to ensure consistent cross-device experience.

Airline Booking System — Data Warehouse & BI Solution

2025 – 2026 | Year 3, Sem 1

Tech Stack: *SQL Server, SSIS, SSAS, Power BI, DAX, T-SQL*

- Designed a Star Schema data warehouse integrating 69 million+ fact records, built 6 SSIS ETL pipelines with error handling and SCD Type 2, and deployed an SSAS OLAP cube for analytical reporting.
- Developed 4 interactive Power BI dashboards with DAX measures published to Power BI Service, enabling stakeholder self-service analytics on booking trends, revenue, and route performance.

CERTIFICATIONS & ACHIEVEMENTS

-
- Diploma in English — British College
 - Hackathon Participant — Yarl Geeks Challenge 2024
 - Code Storm Competitive Programming — Participant 2023 & 2024

SOFTSKILLS

Strong Willingness to Learn | Problem-Solving Mindset | Teamwork | Critical Thinking | Time Management | Effective Communication

LANGUAGES

Tamil: Full Professional Proficiency | **English:** Intermediate Working Proficiency
